

AUTONOMY

Oracle EBS Application Pack - Business Overview

Autonomy capabilities for Oracle E-Business Suite operations.

Sirvisetti - Autonomize Your Business

Connect. Automate. Autonomize.

Why Oracle EBS customers care

Expose business outcomes without exposing application mechanics.

01 Users and agents can ask for outcomes across purchasing, payables, order management and HR.

02 Autonomy resolves the business capability, application binding and target environment.

03 Oracle EBS remains the system of record; Autonomy governs the action path.

Representative business areas

Initial planning areas for Oracle EBS coverage.

Purchasing

PO inquiry, suppliers, requisitions and approvals.

Payables

Invoices, holds, payments and exceptions.

Order Management

Orders, status and customer inquiries.

Shipping

Delivery and shipment status.

HRMS

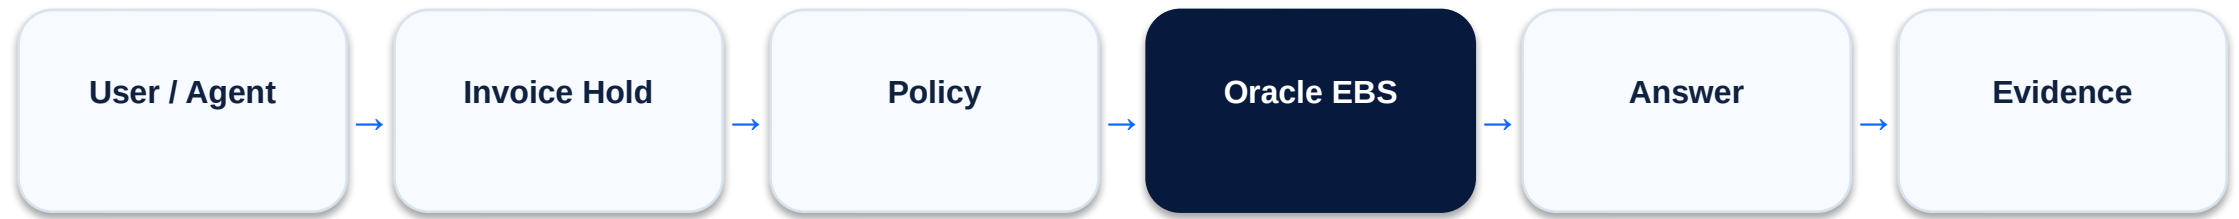

Employee and onboarding-related capabilities.

Reporting

Cross-module business inquiry.

Example: Explain invoice hold

Intent is resolved to a governed Oracle EBS capability.

Value story

Reduce dependence on screens and tribal knowledge.

01

Business users ask for outcomes in business language.

02

Agents consume bounded capabilities rather than broad application access.

03

Environment boundaries and identity mappings stay explicit.

04

Coverage expands through Oracle EBS Application Pack releases.
